EU Digital Identity

Wallet  
Overview

20. & 21. Januar

2026

# elDAS ecosystem

# eIDAS 2.0 will change identification, authentication and credentialing in the EU

## Regulatory environment:

- ✓ eIDAS 2.0 introduces a European Digital Identity Wallet (**EUDI Wallet**) for all citizens in the EU - **regulation already in forces**
- ✓ **Harmonisation of eIDAS, AMLR & PSD**
- ✓ The EUDI-Wallets of all member states must be **interoperable**
- ✓ **Connectivity compliance** with all certified EUDI-Wallets across Europe by end of **2027**

## Why is eIDAS relevant for you?

There is a regulatory acceptance **obligation** in certain sectors

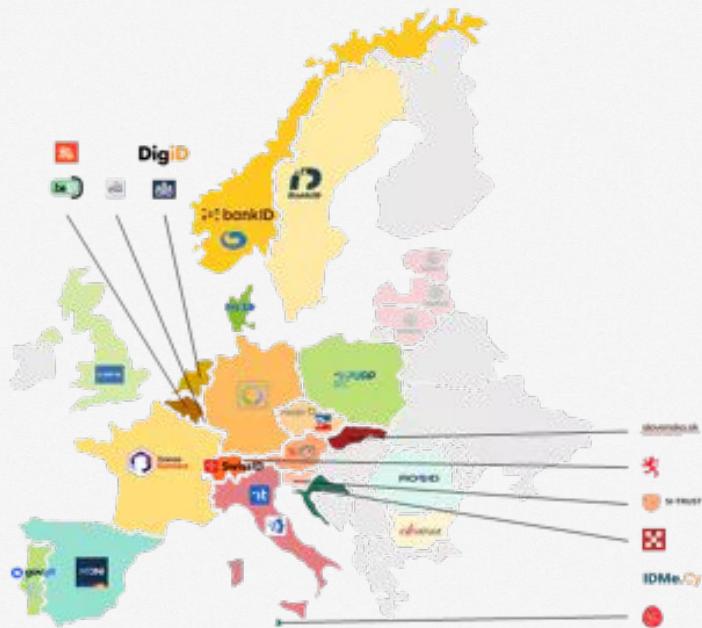

The use of the wallet can lead to high cost savings, e.g. in **KYC processes**

The wallet offers the opportunity for **process optimisation** and digitalisation

The wallet can be an enabler for **new business models**

**eID in the EU today (not exhaustive)****EU vision of digital identity 2027**

## Timeline of the German EUDI Wallet integration - Source: German Government

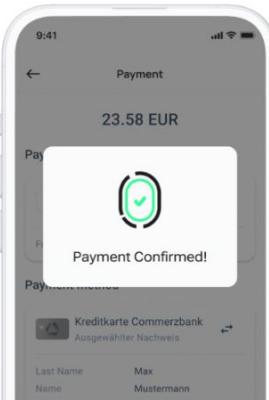

# Multi-Wallet-World

## Use cases:

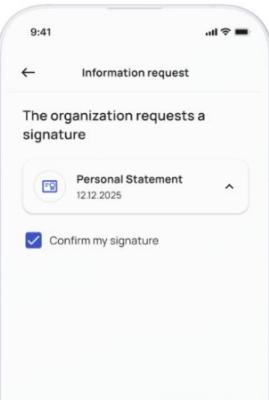

### Identification

Identify your users with their national eID card. Replace costly and complicated processes.

### Transaction Approval

Allow your users to easily authenticate payments and transactions via their EUDI Wallet.

### Digital Signing

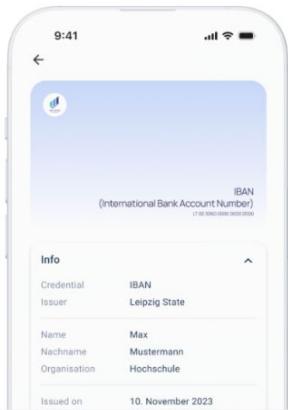

Enable your users to sign digital documents quickly and efficiently with the EUDI Wallet.

### Easy Checkout

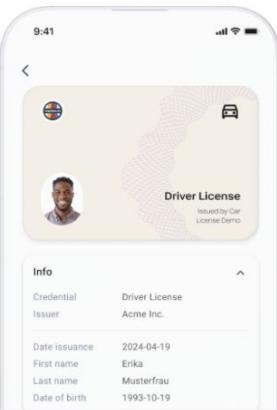

Allow users to shop securely and check out within seconds on your website with the EUDI Wallet.

# Use cases:

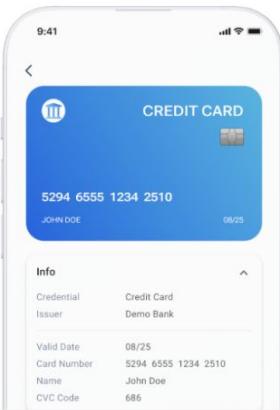

## Issue an IBAN

Allow your users to store and proof ownership of their bank accounts and account details.

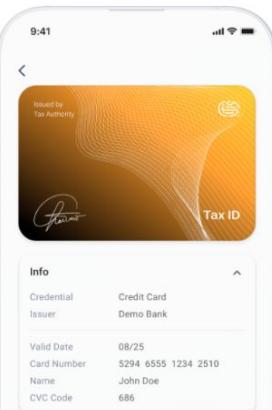

## Driver license verification

Request and verify your users' mobile driver licence online or offline with the EUDI Wallet

## Payment attestation

Confirm your users' transactions. Allow them to prove purchases, payments or contract fulfilment.

## Age verification

Verify the age of your users without them having to reveal their date of birth.

## Organisations, which signaled their interest to be a private EUDI Wallet provider in Germany

**Lissi enables financial institutions to  
seamlessly integrate their use cases  
and interact with EUDI wallets**

The **critical application that organisations need** to implement use cases is the **Lissi ID-Wallet Connector**

All required **features** in one Connector

1. Can be easily deployed into organisations **own on-premise environment or run in the cloud**

2. **Is multi-tenant capable:** Organisations can create clients and use the application for different legal entities or departments

3. Can be **directly connected** to organisations existing hardware security modules, databases and IAM systems or external service providers (e.g. qualified trust services)

4. Aggregates **all future certified EUDI-Wallets** in all EU member states

## Selected **partners and users** of the Lissi EUDI Wallet connector

**BV**bank-verlag

**COMMERZBANK** 

**adesso** 

 **Intesa**  
a Kyndryl Company

**SPRIN-D**

**GRUPPO**  
**Maggioli**

**Ping**  
Identity®

Looking forward to working with you
